

Now football and glasses do go together

Glasses and football have never been an ideal combination, and health and safety rules mean that children are not permitted to play wearing their glasses. But now, thanks to Specsavers, there's no need for your child to struggle with below-par vision, or wear contact lenses if they find them uncomfortable.

Specsavers' range of prescription sports goggles offer perfect vision and protect your child's eyes for only £45. So now, with our striking goggles, your child can look good, stay safe and be part of the action.
